

CITY OF SPRINGFIELD
INTER-OFFICE MEMORANDUM

ATTENTION OF _____ FILE _____

DATE _____ June 21, 1982 _____

DEPARTMENT _____

Re: Ink in the Drainage Ditch behind 900 N. Belcrest
(Southern Missouri Container)

Sewer maintenance crew #552 while checking the City's sewer main behind Southern Missouri Container, 900 N. Belcrest, noticed what appeared to be ink in the storm drainage ditch on the south side of Pythian Street just east of Belcrest. This office was immediately informed of the problem.

Personnel from this office investigated the incident and found that Southern Missouri Container's sewer line was plugged up and was surfacing in the ditch along Pythian Street. Mr. Earl Vote was contacted at Southern Missouri Container. He was advised of the severity of the situation and that he should correct the problem as soon as possible. Also Mr. Vote was informed to block off the drainage ditch and have a septic tank truck come out and pump the ink and sewage out of the ditch. Mr. Vote said that they would take care of the problem.
